It's Been A While Since I Updated The Core, But I Updated It. On Sunday I Updated The Site To XooPS Cube Legacy w/The XooPS 2 System Module From XooPS 2.x JP. It Was An Easy Update, There Were Many Changes And Some Little Problems, But Nothing Major. No One Would Know It, If I Didn't Say Anything.

Oh. And The Site Is A Bit Of A Mess Right Now. I've Been Moving Things Around.
